FOR

**“ A CALL TO ACTION FOR
GLOBAL ORAL HEALTH ”**

GLOBAL ORAL HEALTH BURDEN

According to the World Health Organization (WHO), approximately **3.5 billion people worldwide suffer** from oral diseases, making them some of the most prevalent health conditions globally.

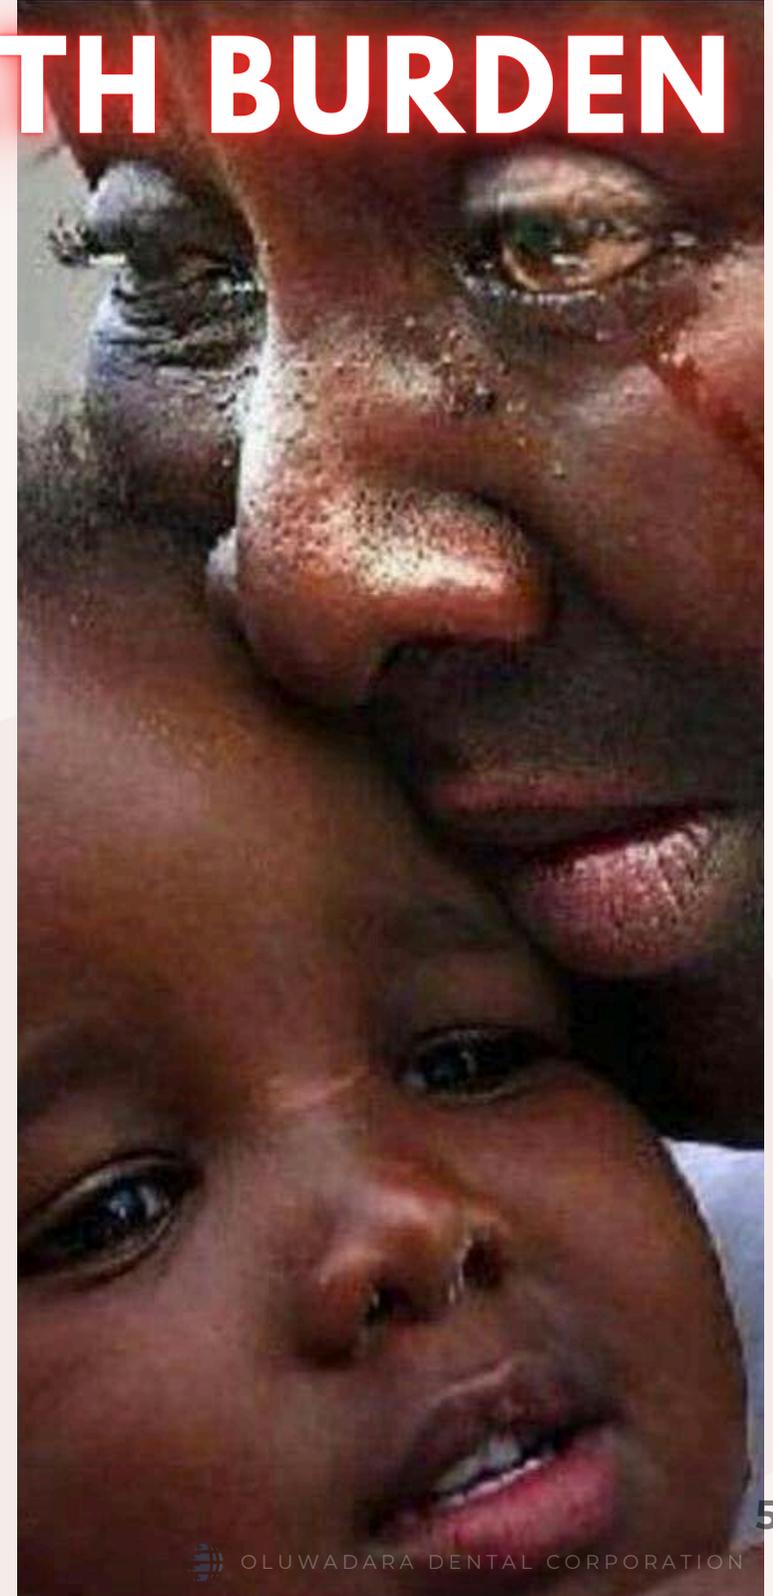

Not just this—the mouth holds secrets to deeper health issues.

What you see is only the beginning. Beneath the surface, over **120 deadly systemic diseases**—including heart disease, diabetes, pregnancy complications, and respiratory infections—leave their first warning signs in the mouth.

Ignoring them isn't just risky—it could be life-threatening.

Oral diseases cost \$710 billion economy loss annually!

The challenge is massive, but so is our vision!

At Oluwadara Dental Corporation, we are on a mission to change this by pioneering breakthrough **research** in oral biology, cancer detection, and salivary diagnostics. Through **tele-dentistry**, **mobile dentistry**, and **digital health**, we are eliminating barriers to care and reaching underserved communities.

By empowering **healthcare providers** with **advanced training**, **education**, and **latest tools & equipment**, we strengthen the foundation of oral healthcare worldwide. And through strategic advocacy, we collaborate with governments, institutions, and global health organizations to shape policies that prioritize oral health as a fundamental pillar of overall well-being.

RESEARCH

**RESEARCH BEING THE
FOUNDATION OF OUR
APPROACH.**

The **first step** is comprehensive research, which helps identify country-specific pain points and key oral health issues.

Based on research insights, we define problem statements and develop targeted solutions, including telehealth, mobile dentistry, infrastructure expansion, and workforce training.

COMMUNITY-DRIVEN RESEARCH FOR UNDERSTANDING ORAL HEALTH CHALLENGES

Oral diseases don't just happen—they are shaped by where we live, how we eat, and what care we can access. By embedding research directly within communities, we uncover the real barriers to oral health and develop solutions that truly work.

CLINICAL TRANSLATIONAL RESEARCH FOR EARLY DISEASE DETECTION

We collaborate with leading laboratories, research institutions, and healthcare professionals to develop **saliva- and blood-based diagnostic tools** a powerful biomarker, that detect systemic diseases like diabetes, cardiovascular issues, and even cancer, enabling proactive, life-saving care.

EVIDENCE-BASED DENTISTRY: BRIDGING SCIENCE AND CLINICAL PRACTICE

Our work focuses on systematically analyzing clinical trials, patient data, and peer-reviewed studies to develop treatment protocols that enhance patient outcomes and streamline best practices.

RESEARCH-SUPPORTED DENTAL HOSPITALS

These centers will serve as hubs for data collection, advanced treatment development, and training the next generation of dental professionals, ensuring a sustainable, research-driven approach to oral healthcare.

TELE-DENTISTRY

**BRINGING DENTAL CARE CLOSER TO PEOPLE
— ANYTIME, ANYWHERE!**

Low-income countries have 12x fewer dentists per capita than high-income nations and rural populations face extreme shortages, forcing many to self-medicate or go untreated.

TELE-DENTISTRY IS THE SOLUTION.

By leveraging AI we offer remote monitoring, tele-consultations, virtual integration, cloud-based EMR, digital imaging, electronic prescriptions, and a Tele-Ed platform.

With our advanced cloud-based infrastructure, we empower patients, dentists, and governments to improve overall healthcare outcomes while minimizing costs.

The growing integration of tele-dentistry into insurance frameworks across countries like the United States, Canada, Australia, and the UK highlights its long-term sustainability and scalability.

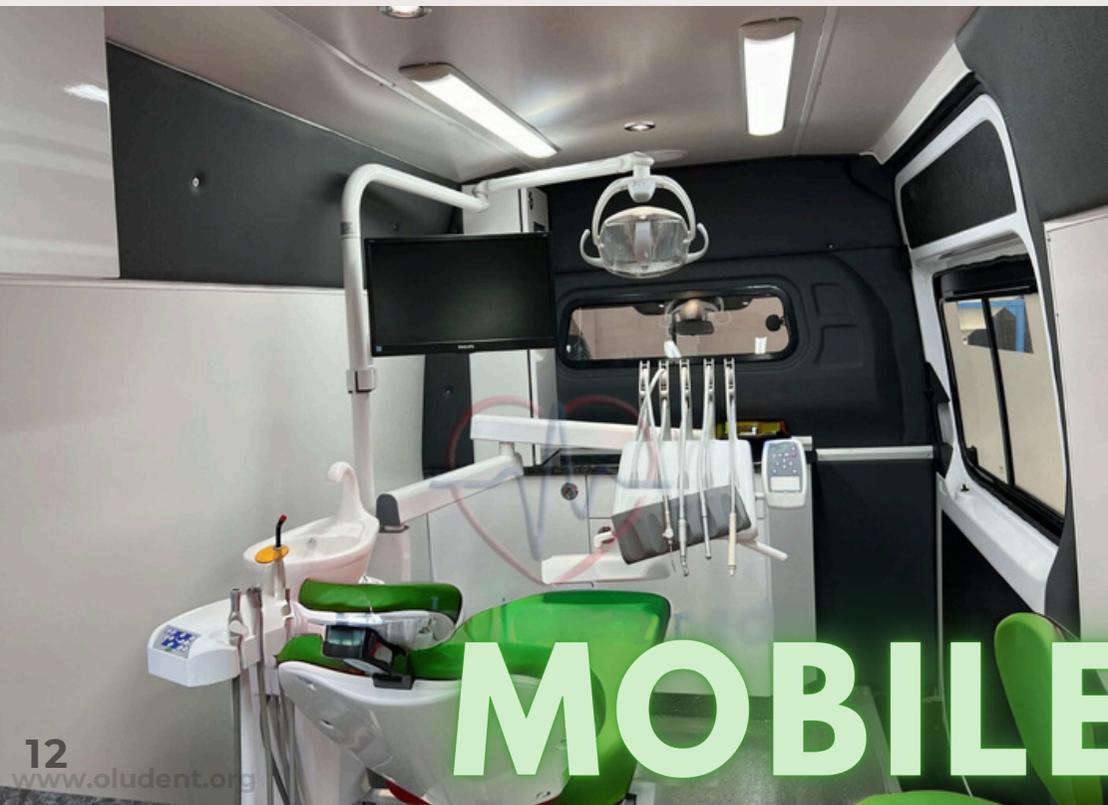

As regulatory policies continue to support reimbursement models, early investors in tele-dentistry infrastructure stand to gain substantial long-term returns, benefiting from the industry's inevitable expansion and adoption.

DENTAL CLINICS ON WHEELS

WHO identifies five main oral diseases caries (decay of deciduous and permanent teeth), severe periodontal (gum) disease, edentulism and lip and oral cavity cancer - all requiring direct intervention by a dentist, making **MOBILE DENTISTRY** the critical next step in bridging access gaps.

With the necessary permissions from any jurisdiction, Oluwadara Dental Corporation provides fully equipped customized MOBILE DENTAL VANS with dental chairs & essential tools, ensuring access to preventive care or treatment anywhere, especially reaching low-income individuals, people with disabilities, the elderly, refugees, prisoners, rural communities, children, or economic constraints, who often face the highest burden of oral diseases.

The global mobile dental unit market is projected to grow from USD 1.4 billion in 2023 to USD 3.2 billion by 2030, at a compound annual growth rate (CAGR) of 10.8%.

MOBILE DENTISTRY

DIRECT PATIENT CARE

Our Direct Patient Care Services ensure that preventive, restorative, cosmetic, and surgical dental treatments are **all treatment available under one roof** for maximum convenience.

There are individuals daily who endure significant dental pain, infections, trauma, extensive gum diseases, and overall health setbacks. We attend to such patients on a daily basis, providing direct care or assisting in emergencies.

We recognize the intricate connection of the human body, where overall health is manifested in the mouth, often considered the true mirror of the body.

Our services encompass all facets of general dentistry, advanced oral care, and comprehensive full-mouth rehabilitations.

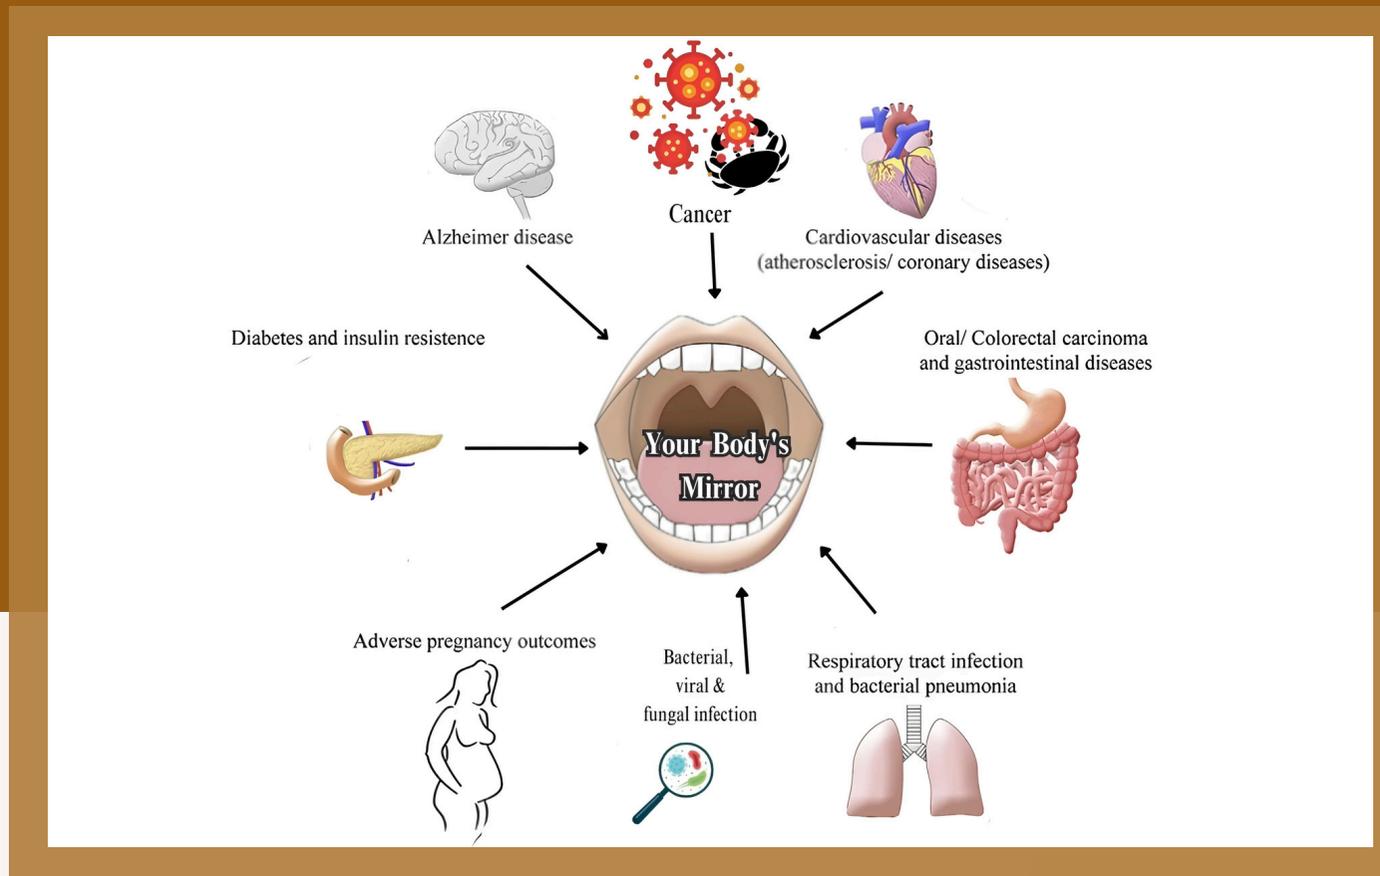

“

**“TAKING
QUALITY CARE
TO EVERY
CORNER
WORLDWIDE!”**

MOBILE HEALTHCARE AND DENTAL UNITS

Our Mobile Healthcare Units enable early intervention & extend beyond dentistry to provide comprehensive medical care.

Mobile healthcare units **break barriers like geographic isolation, financial constraints, physical disabilities, and social disparities, delivering essential medical and dental services.**

These specialized vehicles act as fully functional hospitals and dental clinics on wheels, eliminating the need for long-distance travel or costly hospital visits.

COMPREHENSIVE SERVICES PROVIDED BY OUR MOBILE HEALTHCARE UNITS

DENTAL & ORAL HEALTH SERVICES

- Examinations & Oral Cancer Screenings
- Cavity Treatment & Fillings
- Gum Disease Treatment
- Extractions & Minor Surgeries
- Fluoride Treatment & Sealants
- Dentures & Prosthetics

GENERAL HEALTH -CARE MEDICINE

- Chronic Disease Management
- Maternal & Child Health Services
- Cancer Screenings & Biopsies
- Blood Tests & Diagnostics
- Telehealth Consultations
- Mental Health Support

LATEST TECHNOLOGY

- Satellite Internet & AI Diagnostics
- Cloud-Based EMR Systems
- Portable Imaging Equipment
- Accessible Restrooms & Disability-Friendly Facilities

Working in collaboration with counties, local governments, and foreign nations, we provide the facility to tailor a meticulously plan & construct dental and medical health facility.

EQUIPMENT & INSTRUMENT SERVICE

We specialize in distributing high-quality medical and dental consumables and equipment, manufactured in the United States.

From consumable supplies, pharmaceutical products, advanced equipment such as X-rays, chairs, or hospital machinery, to other dental and surgical supplies, including diagnostic sets and protective gear, we are committed to offering top-grade products suitable for international export.

Our selection is distinguished by its superior quality, cost-effectiveness, adherence to regulatory standards, and overall reliability.
